We invite you

Neurolite Academy – NIBS Training Course

A milestone in psychiatry: rTMS covered by Swiss Basic Insurance (OKP) from 2028!

Non-invasive brain stimulation techniques (so-called NIBS) are essential tools in modern psychiatry, supporting both clinical research and therapeutic applications. As this is such a vital topic and demand remains high, we are pleased to offer a new edition of this course.

Among these, repetitive Transcranial Magnetic Stimulation (rTMS) has established itself as a key method for treating treatment-resistant depression (TRD).

After years of dedicated efforts, the Federal Office of Public Health (FOPH/BAG) has decided to **officially include rTMS as a covered service under basic health insurance** (OKP) in Switzerland, effective January 1, 2028. This **milestone** ensures access to this modern treatment for patients suffering from treatment-resistant depression. While the exact reimbursement conditions and rates are currently being finalized between the associations and the FOPH, this decision marks a **historic step** forward for **psychiatric care** and **patient accessibility**.

To equip you with the latest **knowledge** and **practical expertise** ahead of this transition, the Neurolite Academy invites you to the **9th NIBS Training Course in Bern on January 26, 2027**.

Learn from top specialists, explore the **latest clinical evidence**, and gain **hands-on experience** with **cutting-edge stimulation technologies** designed to support your psychiatric practice.

We look forward to welcoming you to this exciting new edition of our NIBS Training Course!

Sincerely,

Florent Crépin

Dipl.-Ing. CEO
Neurolite AG

Program

Tuesday, January 26, 2027
